EASY TO USE SAFETY COVERS

Our convenient safety covers are an automatic four seasons cover that completely covers and secures your swim spa, hot tub or swimming pool. Preventing unauthorised or accidental entry is essential for your peace of mind, whether to protect your family, pets or keep your treasured water item secure whilst on holiday.

Our covers are available as inground or above ground versions in a variety of colours and are suitable for all new build or refurbished pool configurations. Our convenient all weather covers combine the performance of hydraulic motors with extremely durable materials and brilliant manufacturing techniques: rust proof anodised aluminium rails and UV protected fabric. The power from the hydraulic motors makes opening your swim spa, hot tub or pool incredibly quick and easy - less than 1 minute for a large 9m pool.

The cover prevents all access to water, even around the edges therefore reducing water loss by evaporation, chemical loss and heat loss. Over the years this will add up to quite a saving!

Our completely opaque and watertight covers act as a barrier against debris all year round and it is ideal for water spaces close to trees. Reducing cleaning is everyone's goal - less time to keep it clean, more time to enjoy it. Thanks to its UV PVC fabric, it is incredibly easy to maintain and will keep its aesthetical appearance for years. Our covers make a superb investment choice for the discerning buyer and ensure peace of mind for your whole family in the long term.

Inground version

The in ground automated and convenient safety cover option for new build projects. It is concealed in a dry pit and retracts clear of the pool.

- Corrosion resistant aluminium rails.
- 3 models available: Under the coping, flush mount in the pool side or surface mounted.

Above ground version

Perfectly suited for refurbishment projects and free form pools. Concealed in a box the cover fits harmoniously into your pool environment.

- Bench structure in high strength grey powdered aluminium.
- IPE wood decking (option), as shown above
- Corrosion resistant aluminium rails
- 2 models available: flush mount in the pool surround or surface mount.

SPECIFICATIONS

Maximum cover size: 7 x 14 m.

- Powerful and reliable hydraulic motors (1 motor to open, 1 motor to close).
- PVC fabric assembled using high frequency welding.
- Corrosion resistant aluminium rails.
- Delivered with a water evacuation pump to drain rainwater off the cover.
- Remotely controlled by Wi-Key, remote wireless control box.

Standard colours

Non standard colours
